REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art of record Tsuei et al (U.S. PG. Pub 2004/0260653) discloses a merchant server system including a computer processor and associated memory, the merchant server system offering items for sale.

JP 2006185179 A, Nishida et al discloses a public key authentication system including a public key of a user A and an address of a user terminal 1A to the user terminal 1A.

However, neither Tsuei nor Nishida singularly or in combination discloses the recited feature:

As per claims 1, 12, 26 and 27 "security server system distinct from said merchant server system and including a computer processor and associated memory, said security server system being selectively coupled to said buyer system to receive buyer information from said buyer system in the course of said transaction, said buyer information including delivery address information and payment information, a payment processor server system distinct from the security server system and including a computer processor and associated memory, said payment processor server system being selectively coupled to said merchant server system, wherein said merchant server system transmits at least a payment portion of said encrypted buyer information to said payment processor server system for processing during said transaction, wherein said merchant server system cannot decrypt said encrypted payment information and said payment processor server decrypts said encrypted payment information and using said decrypted payment

information, determines if said transaction is authorized or not, and communicates said determination to said merchant server system”.
